ANS 4932 WILD DISCOVERIES: ZOOMING INTO THE SCIENTIFIC METHOD

FALL 2016

Course Textbook (required):

Course Overview
Office Hours MW 2-3 PM (or by appointment)
Instructor: Dr. Chris Mortensen, 231E ANS Building
cmortensen@ufl.edu, 392-0133
Course Objectives

The ANS 4932 course is designed for students with an interest in research and covers the principles of the scientific method. Students will learn about how scientists have answered some of life’s greatest mysteries. By the end of this course, students will not only understand the basics of research, they will have conducted their own personal research project. During the course students will learn about postulating a research hypothesis, develop a research plan, test their hypothesis by collecting and analyzing data, and then report their findings. To facilitate this research experience, the course will use animal behavior as the investigative setting, which is intended to provide a fun and engaging environment for students to learn about the basic tenants of research. At the conclusion of this course students will be able to:

1. Understand how research is planned and conducted
2. Apply the scientific method
3. Design a research experiment
4. Collect and analyze research data
5. Comply with universally accepted research ethics
6. Support research conclusions verbally and in written form

Course Assignments

The course is set up sequentially to assist students in understanding the process of conducting research. Each week (see Course Schedule below) students will discover a new aspect of research that will lead them to conducting their own experiment in collaboration with other students. Students will be expected to complete weekly assignments to keep pace with the course and while no exams will be given, students will be expected to complete an online weekly quiz. Finally, at the end of the semester students (in groups) will submit a research report and present a scientific poster to their classmates.

Weekly assignments will be given each week in class, to be due by the posted deadline. Each assignment will be worth 10 points each week. The focus of the assignments will pertain to the topics covered in lecture. Weekly online quizzes will be given to the students to cover the previous week’s lecture and reading material. Each quiz will be worth 10 points and due by the posted deadline. Attendance is worth 10 points each class period.

Students will be formed in research teams by week 2 of the semester. Each team will be expected to work together in developing and testing a research hypothesis. At the end of the semester teams will submit a final written report worth 100 points. In addition, each team will be asked to prepare and present a research poster to the class worth 50 points. Grading rubrics will be provided.

**NOTE: this course is flipped, lectures and quizzes must be completed online each week before Thur**
Research Project

The emphasis of this course is on how to conduct sound and ethical research. Therefore, students will be expected to apply the scientific method to investigating animal behavior. The tenants learned can be applied to any field in science, technology, engineering and mathematics (STEM). Weekly assignments are designed to assist the students in this process and are set up sequentially so students will have assistance in developing a research hypothesis, establishing a research plan, executing their research plan in collecting data, learn how to properly analyze their data, and the capstone activity will be students reporting on their data by turning in a short (5-page max) research report and presentation of a research poster on their findings to the class.

Collaborating in research is paramount to having a successful career in any STEM field. Therefore, students will be organized into research teams (~5 students each). The purpose is to not only for students to learn how to collaborate together in a research environment, but also for students to assist each other in conducting sound research. Teams will be expected to work together in formulating a research plan, evaluate animal behaviors together, analyze their results and turn in one research report and one scientific poster as one team. Grading rubrics will be provided.

During the semester teams will either be designated to observe animal behaviors as live in person or will observe animal behaviors over web-based cameras. The animals we will be using will be housed either at the University of Florida Department of Animal Science’s animal units and/or animals housed at the Santa Fe Teaching Zoo. Teams will schedule with the instructors for viewing times on the species of their choice during the weeks of the semester designated as data collection weeks. A schedule will be posted and students will be given personal access log in information to the camera controls.

Course Research Symposium

Presenting data to the scientific community is critical in any research career. Therefore, at the conclusion of the semester we will hold a special research symposium where teams will be present their research findings in the form of a scientific poster. We will do this online using video conferencing. Students will be given guidance by the instructor in forming their research conclusions and in the building of their scientific poster.

Grading Scale

Total points for the course will be 510 points.

<table>
<thead>
<tr>
<th>Category</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quizzes</td>
<td>120</td>
</tr>
<tr>
<td>Assignments</td>
<td>120</td>
</tr>
<tr>
<td>Research Report</td>
<td>50</td>
</tr>
<tr>
<td>Attendence</td>
<td>120</td>
</tr>
<tr>
<td>Research Report</td>
<td>100</td>
</tr>
</tbody>
</table>

Grade breakdown will be based on the following point totals:

- A = 510 to 459
- B = 458 to 408
- C = 407 to 357
- D = 356 to 306
- E = < 305
Course Schedule

WEEK 1  Topic 1: Welcome and syllabus overview
Quiz 1 (syllabus) Read: Chpt 1 pp. 1-18
Complete CURE survey
Complete Cornell Critical Thinking Test
Read and sign Informed Consent of Students

WEEK 2  Topic 2: What is the scientific method?
Quiz 2 Read: Chpt 2 pp. 33-43
History of research Homework: Meet with research team
Basics of the scientific method

WEEK 3 – Topic 3: Animal behavior research
Quiz 3 Read: Stereotypic behavior of Asian elephant
How to observe & collect behavior data Homework: Conduct inter-observer test
Creating & using an ethogram

WEEK 4 – Topic 4: Conducting a literature review
Quiz 4 Read: Chpt 3 pp. 48-61
Learning to read scientific literature Homework: Formulate Team hypothesis
Searching for research articles

WEEK 5 – Topic 5: Formulating a research plan
Quiz 5 Read: Chpt 4 pp. 66-74, Chpt 6 pp. 99-105,
Hypothesis driven research Chpt 13 pp. 256-267
Organizing research Homework: Formulate teach research plan

WEEK 6 – Topic 6: Collecting data
Quiz 6 Read: Chpt 9 pp. 170-190, Chpt 12 pp. 228-234
Data collection techniques Homework: Organize data set
Organizing a set of data Teams begin data collection

WEEK 7 – Topic 7: Data analysis
Quiz 7 Read: Chpt 15 pp 294-309 and 327-329
Making sense of data Homework: Analyze a given data set
Simple statistics

WEEK 8 – Topic 8: Interpreting results
Quiz 8 Read: Chpt 16, pp. 332-349
What does it all mean? Homework: Create two graphs
Summarize Findings
## WEEK 9 – Topic 9: Reporting data

**Quiz 9**
- Compare your research with others
- Format for sharing results

**Read:** Chpt 17, pp 354-361

**Homework:** Team progress report

## WEEK 10 – Topic 10: Abstracts and posters

**Quiz 10**
- What to do when it goes wrong
- Abstracts and posters

**Read:** How to write a good abstract

**Homework:** Team abstract

## WEEK 11 – Topic 11: Scientific writing

**Quiz 11**
- Preparing a manuscript (Research Report)
- Plagiarism

**Read:** How to write a scientific article

**Homework:** Team research report draft

## WEEK 12 - Topic 12: Ethics in research

**Quiz 12**
- Laws regulating research
- Research mistakes and misconduct

**Read:** Chpt 14, pp 282-290

**Homework:** Case study

**Teams end data collection**

## WEEK 13- Topic 13: Science as a career

- Animal and human use protocols
- Careers in STEM

**Read:** STEM 101: Intro to tomorrow’s jobs

**Homework:** Complete course wrap up activities

**THANKSGIVING BREAK- work with groups on finalizing poster and paper**

## WEEK 14- Topic 14: *Course Wrap Up*

- Complete CURE Survey
- Complete Cornell Critical Thinking Exam
- Complete course evaluations

## WEEK 15- Topic 15: Special research symposium

- Location: time to be announced, will be hosted online

****There is NO final exam**

### Make-up Policy

In order to make up any missed quizzes or assignments, verification of illness in the form of a note from the physician will be required that can be scanned in and emailed to Dr. Mortensen. The instructor reserves the right to administer an alternate make-up exam/quiz. All makeup quizzes and assignments must be turned by the date communicated by the instructor. An alternative assignment will be given to any excused students who missed completing their peer evaluations.
Academic Honesty

In 1995 the UF student body enacted a new honor code and voluntarily committed itself to the highest standards of honesty and integrity. When students enroll at the university, they commit themselves to the standard drafted and enacted by students.

In adopting this honor code, the students of the University of Florida recognize that academic honesty and integrity are fundamental values of the university community. Students who enroll at the university commit to holding themselves and their peers to the high standard of honor required by the honor code. Any individual who becomes aware of a violation of the honor code is bound by honor to take corrective action. The quality of a University of Florida education is dependent upon community acceptance and enforcement of the honor code.

The Honor Code: We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.

On all work submitted for credit by students at the university, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.”

The university requires all members of its community to be honest in all endeavors. A fundamental principle is that the whole process of learning and pursuit of knowledge is diminished by cheating, plagiarism and other acts of academic dishonesty. In addition, every dishonest act in the academic environment affects other students adversely, from the skewing of the grading curve to giving unfair advantage for honors or for professional or graduate school admission. Therefore, the university will take severe action against dishonest students. Similarly, measures will be taken against faculty, staff and administrators who practice dishonest or demeaning behavior.

Students should report any condition that facilitates dishonesty to the instructor, department chair, college dean or Student Honor Court.

(Source: 2010-2011 Undergraduate Catalog)

It is assumed all work will be completed independently unless the assignment is defined as a group project, in writing by the instructor.

This policy will be vigorously upheld at all times in this course.

Students with Disabilities

The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues.

0001 Reid Hall, 392-8565, www.dso.ufl.edu/drc/

Software Use

All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal
penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

**Campus Helping Resources**

Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university’s counseling resources. Both the Counseling Center and Student Mental Health Services provide confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance. The Counseling Center is located at 301 Peabody Hall (next to Criser Hall). Student Mental Health Services is located on the second floor of the Student Health Care Center in the Infirmary.
