Dear Symposium Participants:

We welcome you to the Third Annual Florida Ruminant Nutrition Symposium. The decade of the nineties promises changes of astonishing dimensions in our animal feed and livestock industry. Technology advances of unbelievable magnitude will offer mind boggling options for new practices of beef and dairy production which will challenge our ability to adapt and compete in this new world of the future. This symposium has been planned and designed to offer you the latest in research and technology to help you meet and conquer these challenges of the nineties.

Special appreciation is expressed to the speakers at the symposium and to the sponsors for their assistance and support. Also, we wish to express appreciation to the planning committee for their work in selecting the topics and planning the program. In addition, we are grateful for the assistance received from the Animal and Dairy Science Departments of IFAS.

The American Registry of Professional Animal Scientists have assigned 6 units of Continuing Educational Units to this symposium. We trust that you will find the symposium both enjoyable and educational.

Sincerely yours,

*Bernie Haskins*
