Dear Symposium Participants:

We are pleased to welcome you to the Fourth Annual Florida Ruminant Nutrition Symposium. The decade of the nineties continues to promise changes of astonishing dimensions in our animal feed and livestock industries. In order to remain competitive, we must be willing to meet the challenge and adapt to the research and technology advances that are continually available to us. This symposium has been planned and designed to offer you the latest in research and technology advances and to help you meet and conquer the challenges of the nineties.

Special appreciation is expressed to the speakers at the symposium and to the sponsors for their assistance and support. Also, we wish to express appreciation to the planning committee for their work in selecting the topics and planning the program. In addition, we are grateful for the assistance received from the Animal and Dairy Science Departments of the Institute of Food and Agricultural Sciences.

The American Registry of Professional Animal Scientists (ARPAS) has assigned 6 units of Continuing Educational Units to this symposium. We trust that you will find the symposium both enjoyable and educational.

Sincerely yours,

Bernie Haskins
