COURSE DESCRIPTION

ANS3239L is designed to teach the knowledge, horseback, and management skills required for proper daily horse care and conditioning. Designed for those seeking employment requiring basic horse care skills and for novice horse owners. Students will participate in a series of laboratory activities to increase their knowledge of equine behavior and horsemanship. A third of the semester will involve practical equitation.

Working with Livestock is inherently risky. Many of these animals are capable of injuring people, especially when they are in flight or fight mode inspired by a stressful situation. Instructors will work to provide students with the ability to manage horses with minimal stress, thus lowering the risk of injury to people and animals.

The riding portion of this course is physically demanding and requires that students be able to mount horses unaided and maintain balance while riding.

COURSE OBJECTIVES

- Upon completion of this course, students will have a better understanding of basic daily management techniques.
- Students will have an increased awareness of safe horse handling practices.
- This course will teach horse tack and equipment selection, care, and use.
- Students will develop the base skills needed to tack, mount, and ride a horse.

COURSE FORMAT

- All classes meet at the UF Horse Teaching Unit, 1934 SW 63rd Ave.
- Tuesday and Thursday, 8th- 9th period (3:00-4:55)
- Students will receive credit for attendance and active participation in the class. There will be 3 mini practicums and a comprehensive final practicum. The practicum will include only non-riding skills.
- There will be ONE extra credit opportunity which is due on 11/14 at the latest.
