ANS 6313 Current Concepts in Reproductive Biology
Fall 2019

Frequency of Offering
Odd years, fall semester.

Instructor
P.J. Hansen, Dept. of Animal Sciences
Room 122 Bldg 499 (Dairy Science Building)
E-mail: Hansen@animal.ufl.edu
http://www.animal.ufl.edu/hansen

Purpose
This course uses in-depth discussion of recent review articles and original research publications on controversial or cutting-edge topics in reproductive biology to provide students with opportunities to 1) become aware of recent developments in reproductive biology, 2) develop critical thinking skills and 3) formulate theoretical models to underpin development of research programs. The course is designed for advanced students in reproductive biology and other biosciences.

Requirements
Consent of instructor is required and enrollment will be limited. Extensive experience in reproductive biology or a formal course in reproduction is required. It is strongly recommended that students have completed a course in molecular biology or cell biology.

Course Format
The course meets for 2 hours once weekly. Before class, students are assigned readings consisting of 2 review articles assigned by the instructor and one original research paper chosen by the students. The first hour of the class is taken up with a general discussion of the concepts illustrated in the review articles. The original research paper is evaluated in the second hour in a discussion. Each class period, one student will be assigned to choose the research paper and lead the discussion on the paper.

Time and Place
Usually, Tuesday, 5:00-7:00 PM, Room 102 Bldg 499 (L.E. "Red" Larson Dairy Science Building) although there will be meetings on other dates.

Presentations
The discussion on the review papers will be lead by Dr. Hansen but students will be given an opportunity for shaping the direction of the discussion. Discussion topics will involve (but not be limited to) the following:
--Development of models to organize concepts
--Critical evaluation of concept
--Clarification of confusing areas/concepts
--Critical evaluation experiments on which concepts are based
--Implications for other areas of reproductive biology
--Areas for future research

The research paper will be chosen by the student assigned to that topic. The paper should be a recent paper (2016-2017) that represents a key paper in the progress in that area of research. The student assigned to the paper should distribute the paper to each of the students in the lab one week before class meets. The discussion of the paper will be informal (i.e., without lots of overheads or powerpoint slides) and will focus on the following: The hypothesis, experimental design, results obtained, and significance of the results. All students will be expected to be involved in the discussion of the research paper.

**Readings**
Readings can be found in the electronic journal section of the University of Florida Health Science Library. In addition, Dr. Hansen will email the pdf file for each paper before class. It is expected that all students will have read every article.

For original research papers, the student assigned to find a paper should distribute the paper to each of the students in the lab one week before class meets. Distribution should be via email of the pdf file.

**Grades and Grade Points**
Grading is based on attendance (50%) and participation (50%). The highest grade possible for a student missing two lectures is a B+ and, for a student missing three lectures, is a B. Any student missing four or more lectures will be given an incomplete grade.

For information on current UF policies for assigning grade points, see [https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx](https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx)

**Communication About The Class**
Email will be used as the major method for communicating when not in class. Therefore, provide Dr. Hansen with your email address if one is available. Dr. Hansen's email is hansen@animal.ufl.edu

**Academic Honesty**
As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: “We, the members of the University of Florida
community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity." You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment."

It is assumed that you will complete all work independently in each course unless the instructor provides explicit permission for you to collaborate on course tasks (e.g. assignments, papers, quizzes, exams). Furthermore, as part of your obligation to uphold the Honor Code, you should report any condition that facilitates academic misconduct to appropriate personnel. It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For more information regarding the Student Honor Code, please see: http://www.dso.ufl.edu/SCCR/honorcodes/honorcode.php.

Software Use:
All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

Campus Helping Resources
Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university’s counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.

- **University Counseling & Wellness Center**, 3190 Radio Road, 352-392-1575, [www.counseling.ufl.edu/cwc/](http://www.counseling.ufl.edu/cwc/)
  - Counseling Services
  - Groups and Workshops
  - Outreach and Consultation
  - Self-Help Library
  - Training Programs
  - Community Provider Database

- **Career Resource Center**, First Floor JWRU, 392-1601, [www.crc.ufl.edu/](http://www.crc.ufl.edu/)
Services for Students with Disabilities
The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues. Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation.

CLASS SCHEDULE

Aug 21 Organizational Session

Sept 3 Primordial Follicle Activation

Sept 10 Follicular Growth

September 18 Spermatogonial Stem Cells

September 24 The Oocyte at Ovulation

October 1 Paternal Epigenetic Inheritance

October 15 Role of Seminal Plasma

October 22 New Concepts on Development of the Endometrium

October 29 Embryonic Genome Activation

November 5 Differentiation of Trophoderm and Primitive Endoderm in the Blastocyst

November 12 Species Divergence in the Patterns of Preimplantation Development

November 19 Development of the Placenta

November 25 Regulation of GnRH pulse generation

December 3 Nutrition and Puberty
